Service Activities	Course Advisor MS English Linguistics, Course Advisor PhD English, Departmental Focal Person QEC, Member Discipline Committee.		
Research Interest	<p>My research area, in general, encompasses but is not limited to, issues concerning Sociolinguistics. To be specific, I find a great deal of interest in exploring discourse, its semantic and syntactic choices and rhetorical structures within a specific historical, social or political context to unveil hegemony, ideology and power structures amongst social institutions. My research also focuses on relation between language, gender and society by extending the issues beyond the genderlect merely but focusing more on how a certain individual ‘performs’ the gender (other than biological gender) through the linguistics choices. Moreover, the issues in pragmatics, for example, negotiating meaning in diverse interactional context is yet another area of my interest in the realm of research.</p>
